Individual reflections sprint 1

1. What do I want to learn or understand better? Consider e.g. teamwork, Scrum, agile processes, technologies etc?

This week we started building the project in a programming language and an environment for which I had no prior knowledge (Dart, Flutter and Android Studio). I want to continue learning and get better and more familiar with its applications and mobile application development.

2. What is my contribution towards the team's deliveries? How can I help my team do better next sprint?

As a beginner, I was primarily encouraged to learn how to implement in Flutter. Together with a team member, we developed the interface for two widgets and made it slightly dynamic to different types of data.

3. Changes/improvements from last week's reflection?
